Features

□ Camera Specifications

- CCD Sensor : 1/4" Interline Transfer CCD
- Zoom Magnification : x 10 Optical Zoom, x 10 Digital Zoom (Max x 100 Zoom)
- Day & Night Function
- Various Focus Mode : Auto-Focus / Manual Focus / Semi-Auto Focus.
- Independent & Simultaneous Camera Characteristic Setup in Preset operation

□ Powerful Pan/Tilt Functions

- Max. 360°/sec high speed Pan/Tilt Motion
- Using Vector Drive Technology, Pan/Tilt motions are accomplished in a shortest path. As a result, time to target view is reduced dramatically and the video on the monitor is very natural to watch.
- For jog operation using a controller, since ultra slow speed 0.05 °/ sec can be reached, it is very easy to locate camera to desired target view. Additionally it is easy to move camera to a desired position with zoom-proportional pan/tilt movement.

□ Preset, Pattern, Swing, Group, Privacy Mask and More...

- MAX. 127 Presets are assignable and characteristics of each preset can be setup independently, such as White Balance, Auto Exposure, Label and so on.
- Max. 8 set of Swing action can be stored. This enables to move camera repetitively between two preset positions with designated speed.
- Max. 4 of Patterns can be recorded and played back. This enables to move camera to follow any trajectory operated by joystick as closely as possible.
- Max. 8 set of Group action can be stored. This enables to move camera repetitively with combination of Preset or Pattern or Swing. A Group is composed of max. 20 entities of Preset/Pattern/Swings.
- Privacy Masks are assignable, not to intrude on other's privacy. (4 Privacy Zones)

□ PTZ(Pan/Tilt/Zoom)Control

- With RS-485 communication, max. 255 of cameras can be controlled at the same time.
- Pelco-D or Pelco-P protocol can be selected as a control protocol in the current version of firmware.

☐ **OSD (On Screen Display) Menu**

- OSD menu is provided to display the status of camera and to configure the functions interactively.
- The information such as Camera ID, Pan/Tilt Angle, Alarm Input and Preset can be displayed on screen.

☐ **I/O Functions** (Not Available)

- To reject external electric noise and shock perfectly, alarm sensor Input is decoupled with photo coupler.
- The signal range of sensor input is from DC 11.5 to 14.0 volts to adopt various applications.
- If an external sensor is activated, camera can be set to move to the corresponding Preset position

☐ Reserved Presets for Special Purpose

- Most camera characteristics can be set up easily and directly with reserved preset, not entering into OSD menu. For more information, refer to "Reserved Preset" in this manual.

DIP Switch Setup

Before you install the camera, you should set the DIP switches to configure the camera ID, communication protocol.

Camera ID Setup

- ID number of camera is set using binary number. The example is shown below.

Pin	1	2	3	5	5	6	7	8
ID Value	1	2	4	8	16	32	64	128
ex) ID=5	Off	Off	Off	Off	Off	Off	Off	Off
ex) ID=10	Off	Off	Off	Off	Off	Off	Off	Off

- The range of ID is 1~255. **Do not use 0 as camera ID.** Factory default of Camera ID is 1.
- If you want to control a certain camera, you must match the camera ID with Cam ID setting of DVR or Controller.

□ Communication Protocol Setup

- Select the appropriate Protocol with DIP switch combination.

Switch State		Protocol
P0 (Pin 1)	P1 (Pin 2)	
OFF	OFF	PELCO-D, 2400 bps
ON	OFF	PELCO-D, 9600 bps
OFF	ON	PELCO-P, 4800 bps
ON	ON	PELCO-P, 9600 bps

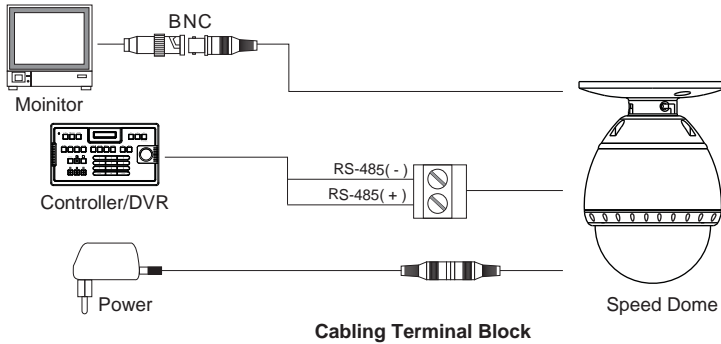

- If you want to control using DVR or P/T controller, their protocol must be identical to camera. Otherwise, you can not control the camera.
- If you changed camera protocol by changing DIP S/W, the change will be effective after you reboot the camera.
- Factory default of protocol is "Pelco-D, 2400 bps"

- Since Pin 3 ~ Pin 4 is only for supplier, DO NOT CHANGE THESE ORIGINAL STATE. If you change one of these, proper operation can not be achieved.

⊙ Pin 3 PAL / NTSC system selection of Camera. DO NOT CHANGE THIS PIN.

Cabling

Power Connection

- Please, check the voltage and current capacity of rated power carefully.
Rated power is indicated in the back of main unit.

Rated Power	Input Voltage Range	Current Consumption
DC 12V	DC 11V~18 V	0.8A

RS-485 Communication

- For PTZ control, connect this line to keyboard and DVR.
To control multiple cameras at the same time,
RS-485 communication lines of them is connected in parallel as shown below.

❑ Video Connection

- Connect with BNC coaxial cable.

❑ Alarm input Connection (Not Available)

- Sensor Input

Before connecting sensors, check driving voltage and output signal type of the sensor. Since output signal types of the sensors are divided into open collector and voltage output type in general, the cabling must be done properly after considering these types.

Sigal	Description
IN COM+	Connect (+) cable of electric power source for sensors to this port as shown in the circuit above.
IN1-,IN2-,IN3-, In4-,	Connect output of sensors for each other port as shown in the circuit above.

If you want to use Alarm Input, the types of sensor must be selected in OSD menu. The sensor types are Normal Open and Normal Close. If sensor type is not selected properly, the alarm can be activated reversely.

<input checked="" type="radio"/> Normal Open	Output Voltage is high state when sensor is activated
<input checked="" type="radio"/> Normal Close	Output Voltage is high state when sensor is not activated

Check points before operation

- Before power is applied, please check the cables carefully.
- The camera ID of the controller must be identical to that of the target camera. The camera ID can be checked by reading DIP switch of the camera .
- If your controller supports multi-protocols, the protocol must be changed to match to that of the camera.
- If you changed camera protocol by changing DIP switch, the change will be effective after you reboot the camera
- Since the operation method can be different for each controller available, refer to the manual for your controller if camera can not be controlled properly. The operation of this manual is based on the standard Pelco[®] Controller.
